

RoS24 Risk and Vulnerability Assessment for the Telecom Sector

On November 15, 2024, TeleDCIS internally released the RoS24 Risk and Vulnerability Assessment to telecom sector members with the classification TLP:AMBER+STRICT. This assessment describes the current resilience of the telecom sector. We appreciate the support received during the execution of RoS24 and our emergency exercise, where the scenario-based approach was applied.

We will continue our planning in 2025, which will again be expanded to include dependencies between providers and suppliers.

Members of TeleDCIS will have access to the full Risk and Vulnerability Assessment.

If you would like to learn more about membership, contact us at **+45 82 13 08 06**.
